SFI™ - SYSCOM Fax Integration

Integrating Rightfax with Content Manager on System Z

SFI™ FAX/Print Server for CM

SYSCOM Fax Integration provides organizations that deploy Content Manager on System Z an easy, seamless way to enable both inbound and outbound faxing capability, as well as highly valuable batch-print processing. SFI™ is a direct interface between CM 8.3 on a z/OS host and a fax, print or file subsystem on Windows.

Features

SFI™ introduces capabilities to Content Manager that allow:

- Direct input of content from RightFax systems

- Direct output of content from CM into a Windows file server

- Direct output of content from CM to a printer

- Direct output of content from CM to a RightFax system

- Mass output of an entire CM folder to print, fax, or file

- Creating output queues for later batch processing to print, fax, or file

Requirements

Platform configuration

Windows Server 2003 (inclusive)
  IBM eServer xSeries (x86-based)
z/OS 1.5 and earlier
  IBM eServer zSeries (Mainframe servers)
z/OS 1.6
  IBM eServer zSeries (Mainframe servers)
z/OS 1.7
  IBM System z (Mainframe)

IBM Middleware

Information Management
  IBM DB2 Content Manager for Multiplatforms
  IBM DB2 Content Manager for z/OS
  IBM DB2 Content Manager Standard Edition
  IBM DB2 ImagePlus for z/OS
  IBM DB2 Information Integrator Content Edition
  IBM DB2 Universal Database Enterprise Server Edition
  IBM DB2 Universal Database for z/OS
Other
  IBM Communications Server for Linux on zSeries
